FLOORS FOR LIVING

KRONOTEX
FLOORS FOR LIVING

We stand for environmental protection

Active environmental protection is one of humanity's biggest and most urgent tasks. Every product which leaves our premises must exhibit both excellent value for money and superb environmental credentials. This starts with the exclusive use of legal, certified raw materials from sustainably managed forests, continues with rigorously monitored production, and also encompasses the subsequent life and ultimate disposal of our products.

The sound-proofing underlay for laminate
and parquet flooring

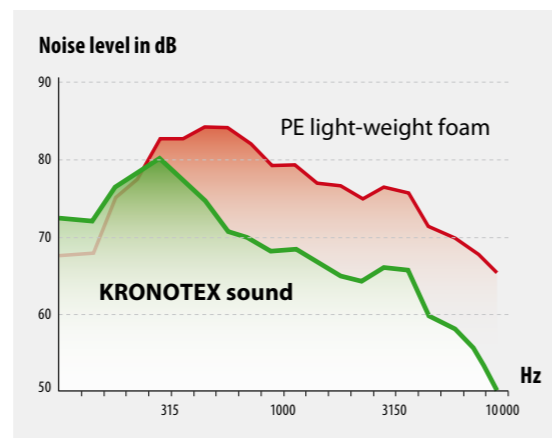

KRONOTEX sound

The new generation – now even more eco friendly

KRONOTEX sound is the sound insulation board for effective impact noise reduction on laminate and parquet flooring. It is made of natural wooden fibres, bound with environmentally friendly binders linked in 3 dimensions. This makes it pressure-resistant but at the same time elastic enough to balance out uneven spots in the floor.

KRONOTEX sound achieves an impact noise improvement of $\Delta L_w = 21$ dB according to the DIN EN ISO 140-8 standard. High frequency noises are transformed into more pleasant deeper tones (short test report PB III/S-05-153-6).

The buildings regulations permit gives permission for our “quiet specialist” to be used in home interiors, as well as having a fire proofing rating class E / E_{fl} for floors (DIN EN 13501-1). KRONOTEX sound has been awarded an EPD (Environmental product declaration) from the IBU (Institut Bauen und Umwelt e.V.), and through our optimised process is now even more environmentally friendly.

- + Now even more eco friendly
- + 25% reduction of footfall and room noise
- + Levels out uneven surfaces
- + Suitable for use with underfloor heating
- + Meets building regulation requirements
- + Awarded an EPD

FORMAT 800 x 675 x 5 mm
BOX 20 pieces = 10.8 m²
PALLET 22 boxes = 237.6 m²
